

# How Lineage Handles Seafood for our Customers from Port to Plate

## FRESH FROM THE SEA

Shrimp is supplied from countries all around the world.

## PREPARED FOR EXPORT

Once caught, shrimp is taken directly to a processing facility. There it's frozen to maintain freshness, put onto pallets and prepared for export from the nearest port.

## SECURING PASSAGE

While the shrimp is being prepared for export, Lineage's freight forwarding team executes the export clearance documentation. Additionally, they secure space on the ocean vessel and arrange for drayage of the export container.

## WELCOME ABOARD, SHRIMP!

Once the shrimp are ready for export, the pallets are floor-loaded onto a temperature-controlled container and shipped leveraging Lineage drayage to the port and tucked away on the ship.

## SHRIMP ARRIVES IN THE U.S.

After the ship arrives at the port, the container is unloaded from the ship, loaded onto a chassis and drayed to a Lineage cold storage facility.

## CHILLED AND READIED FOR ORDERS

Upon arrival at our facility, the container is unloaded, the boxes are sorted, labeled, palletized, and shrink wrapped before being put into storage for safekeeping until a customer order comes through.

## ORDER UP FOR LTL SHIPPING

Once an order is placed via Lineage Link<sup>®</sup>, pallets are pulled from storage and orders are consolidated to maximize trucking capacity. Then they're loaded onto a refrigerated truck headed to a regional distribution center.

## SERVED ONTO PLATES BY LAST MILE DELIVER

Orders are either picked up from the regional distribution centers by the restaurant or delivered directly through Lineage's last mile delivery offering. Once the shrimp arrives at their destination, they are masterfully crafted into a variety of culinary creations and plated for enjoyment.

Over 220 of our 450+ cold storage warehouses are considered port-centric

Container temperature is continuously monitored to ensure shrimp stays fresh throughout its journey

Customers can track their order in real time with Lineage Link<sup>®</sup>, our supply chain visibility platform
